

▶ TURNAER™ XT5 AERATOR

"I have been in the lawn care industry for 35 years and the Turfco TurnAer XT5 is one of the most user-friendly machines I have ever used. It takes aeration to the next level by giving operators the ability to both steer and reverse without having to lift the tines."

Ted Durchik
Durchik Turf Management

So smooth, you'll forget it's an aerator.

The XT5 combines a hydrostatic drive with maximum maneuverability, making it one of the smoothest walk-behind commercial aerators.

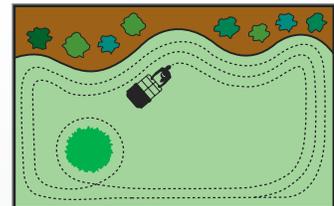

- ▶ Steerable and reversible aeration increases productivity by 50% over traditional aerators.
- ▶ Advanced design reduces operator fatigue.
- ▶ Patent-pending tine wheels enhance steering and increase hill-holding ability.
- ▶ Optimized weight placement balances tine penetration.
- ▶ Rugged, uni-body steel frame minimizes maintenance.
- ▶ Simple, intuitive operation gets you up and running fast.

EasyChange tines can be quickly accessed and replaced.

Two covered drive chains, minimizing maintenance and chain problems.

TURNAER™ TECHNOLOGY

Turfco's revolutionary TurnAer Technology allows you to turn with the tines in the ground. This eliminates the need to stop and lift, allowing you to aerate through the turn. Performance like that saves time and reduces fatigue.

Taking this technology even further, the new XT5 also features a hydrostatic drive system. So now you can turn and steer in reverse.

SPECIFICATIONS

Engines/Models:	Subaru 190cc/85541	Ground Speed:	Forward: 0-4 mph Reverse: 0-2 mph Now even faster-increased by 14%
Drive:	Variable hydrostatic	Dimensions:	33 3/4" w x 47.9" h x 60.4" l
Aerating Width:	24"	Weight:	328 lbs. with standard removable weight
Core Depth:	Up to 3"	Removable Weights:	One 25-lb. weight included, and two 25-lb. weights are available for purchase (Part # 87399)
Tines:	Coring type, 3/4" diameter heat-treated alloy steel		
Productivity:	Up to 0.85 acres per hour
